Temporary Mobility Impairment Procedure

A student with a temporary impairment affecting mobility can work with Trinity staff to seek assistance in maneuvering around campus. If a student with a temporary mobility impairment contacts SAS to inquire receiving assistance, SAS will notify the offices on campus who may be impacted so they are aware of the student’s situation.

Helpful Contacts

**Student Accessibility Services**
Students should first contact the Coordinator of DSS. Students should also notify their faculty members of their impairment and discuss issues which pertain to them during this time. DSS can also assist in this process if students are unable to do so. If the student has other temporary impairment concerns, please refer to DSS.

**Trinity University Police Department**
Campus Security will issue temporary parking permits either for the student or a friend who will be a primary transport resource for the injured student. In order to park in an accessible space on campus, students must contact the Department of Public Safety to request a temporary hangtag.

**Environmental Health and Safety**
Students must contact Environmental Health and Safety (EH&S) if they wish to use a golf cart. EH&S will then be able to provide the students with the golf cart vendors’ contact information and teach them about the appropriate golf cart operating procedures. The use of a golf cart is a privilege which can be revoked if the procedures are not followed.

**Residential Life**
Any student needing temporary assistance in Residential Life should contact the Associate Director of Residential Life.

**Health Services**
If the student notifies the Coordinator of DSS of the injury, the Coordinator will notify the Health Services staff. Health Services may provide some medical assistance.

**Dean of Students Office**
For other issues and assistance, please contact the Dean of Students.
