PrintReleaf empowers you to reduce the environmental impact of printing by certifiably planting trees around the world.

You print one. We’ll plant one.

PrintReleaf is the world’s first platform that automatically converts your paper footprint into actual trees. As you print, you actively replant trees in forests that need it most around the world.

With PrintReleaf, resources borrowed from the earth can be returned and multiplied after use. Through our verified reforestation process, we guarantee 100% net survival of the trees you plant.

Now you can reforest... one print job at a time.

www.printreleaf.com

Software built in Denver, Colorado. Trees planted around the world.
How It Works

PrintReleaf measures your paper footprint based on your cumulative printing. This is done automatically through integrations with market-leading software applications. Then, customers may select where to reforest their consumption through our network of PrintReleaf Certified™ Global Reforestation Projects. Our cloud-based infrastructure and APIs enable seamless integration and limitless scalability.

There is nothing to install on your server. By leveraging the power of the cloud, PrintReleaf is built for scale.

We use your paper consumption totals to calculate your paper footprint which is equal to a specific and accurate number of trees.

You can monitor your cumulative environmental impact on your PrintReleaf Dashboard.

You are empowered to releaf forests based on your paper footprint. The reforestation projects you releaf are up to you!
PrintReleaf automatically measures your paper consumption totals through third-party integrations.

STEP TWO

WE CALCULATE & CONVERT.

Verified Reforestation

There are PrintReleaf Certified Global Reforestation Projects in:
- Brazil
- Dominican Republic
- India
- Ireland
- Madagascar
- Mexico
- United States

SGS International, the world’s leading inspection, verification, testing and certification company, certifies our Global Forestry Partners and leads field audits across our network of projects to verify 100% net survival of our forests.

PrintReleaf provides certificates and reports about the forests you have releafed over time.

Your continue printing according to your needs.
Benefits

With PrintReleaf, you can be part of the solution. You can also be sure the process is automated, precise, verified, and will benefit your brand’s image.

**Environmental Reforestation**
Reforestation provides environmental and ecological reforestation where the planet needs it most.

**Automation**
Completely automated, end-to-end integration from printer to seedling with no software to install.

**Certification**
The PrintReleaf ecosystem is verified by our third-party certifying body, SGS International.

**Recognition**
Through awareness, social marketing, and certifications, you can see and share the positive impact you have on forests around the world.
