

Missing Person Policy

In accordance with federal regulations (U.S. Department of Education Clery Act amendments 2008), and in the best interest of student safety, Trinity University has established a procedure for reporting missing students who reside on campus. Specifically, anyone (including students, employees, family members, employers, etc.) can, and should, report a missing resident to the Trinity University Police Department immediately. Other University officials are available to assist and support those reporting missing persons. While a 24-hour window of waiting time is standard, reports can be made anytime a concern arises. Parents and guardians of students, as listed in the University data system, will be notified in the event a report has been filed. If a student wishes to identify a different individual for notification, his or her contact information must be sent by e-mail to the Residential Life Office at ResLife@trinity.edu. All information is kept confidential. (The University is required to contact parents or guardians of missing students who are under the age of 18.) University Police will notify San Antonio Police Department if there is a student reported missing.
